

CSMRC NEWS October 2007

CSMRC Equipment: Our unit backpacks, blankets and emergency supplies for MRC volunteers have arrived. If you can volunteer some time in the office to help pack the bags with the supplies in our office, please let Kathie Vito know by e-mail kvito@cshealth.org

CSMRC training: It is very important that volunteers complete the training modules. As an incentive, we have our web honor roll and each person who completes all training requirements also is awarded an official MRC polo shirt. During October, the training records of all volunteers will be audited. So please send your certificates in if you have not done so and try to get the on-line modules completed. We also will be contacting those volunteers who have not completed the application process and are not yet approved. Our goal is to get all registered applicants approved and training completed by January 2008.

Fall 2007 Flu: Our two county flu clinics are scheduled!!!
Please go to www.cshealth.org to view the clinic schedules for both counties. Please e-mail kvito@cshealth.org of your interest to participate this fall. We are using biojet injectors this year. Please contact Kathie Vito if you would like training on this device in our office. No health professional may give shots at our routine clinics unless they bring proof of personal liability insurance. Unfortunately the MRC liability coverage is only effective for declared emergencies. We are trying to get this resolved at the state level for future flu clinics. All health professionals must be in-serviced and do a return demonstration with the injector before they may use them in our clinics. We would be happy to provide

training for the injector regardless if the health professional can participate in a clinic or not this year.

As always, thank you for your willingness to be in the CSMRC.
